Subject: RE: Sample Questions for EHCJLI/02/02

Sensitivity: Confidential

Dear Kim,
this is true for hte ACCORD long-term study, ACCORD JLI 02/02. But this is not the plan for all future studies. We have to decide that on a case by case basis.
Best regards
Hans

Hans,

Last week, I had asked about analyzing the samples from subjects who were not randomized on your studies. From our conversation on 21 Jun, MDSPS is to keep all samples for all subjects, randomized or not, and have them analyzed.

This will be followed for all Philip Morris studies.

Thanks
Kim
